

HIGH PERFORMANCE PROTECTIVE COATINGS

COLORS GUIDE

- METAL STRUCTURE COATING
- CONCRETE STRUCTURE COATING
- CONCRETE FLOOR COATING

TOA EPOXY COATINGS - FINISHES

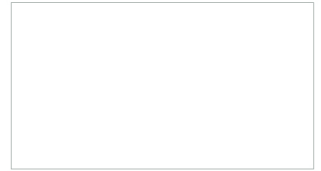

Dark Green 1458

Evergreen 1461

Yellow * 0668

White 9102

Signal Red * 0402

Sky Blue 1460

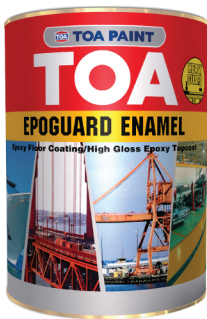

Misty Grey 1457

Executive Grey 0104

* Special Color

SPECIFICATION

- Use on metal and concrete
- Glossy and smooth finish
- Resistant to abrasion, impact, scratch, durable, and broad range of chemical exposure and spillage
- Good durability and excellent protection
- Suggested for steel or concrete surface, interior industrial flooring, marking of working zone, steel structure and etc.

**Available in 5 Litre

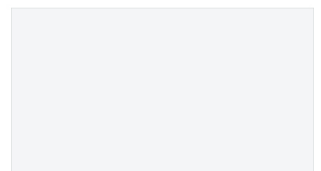

TOA ROADLINE PAINT

Yellow NR: 4146
R: 4246

Black NR: 4144
R: Unavailable

White NR: 4145
R: 4245

SPECIFICATION

- Reflective (R) and Non-Reflective
- Excellent durability
- High abrasion resistance
- Suitable to apply on concrete, bitumen or asphalt surface, both interior or exterior

**Available in 5 Litre

TOA ZINC CHROMATE

Zinc Chromate Primer

SPECIFICATION

- Premium quality anti corrosive alkyd Zinc Chromate Primer
- High quality of pigment to enhance rust resistance properties.
- Excellent anti-corrosive / anti rust properties
- Fast dry
- Excellent adhesion between metal surface and topcoat / undercoat

****Available in 5 Litre**

CAPTAIN METAL PRIMER

Red Oxide Primer

Grey Green Primer

SPECIFICATION

- Anti corrosive alkyd Zinc phosphate Primer
- High quality of pigment to enhance rust resistance properties.
- Good anti-corrosive / anti rust properties
- Fast dry
- Exterior and Interior application
- Good adhesion between metal surface and topcoat / undercoat

****Available in 1 Litre & 5 Litre**

TOA MICACEOUS IRON OXIDE

Silver

4500

Dark Grey

4510

Grey Black

4520

SPECIFICATION

- Low sheen with metallic appearance
- Good durability and excellent protection
- Excellent resistance to atmospheric pollution, high humidity and mild chemical fume attack
- Suggested for steelwork structures, tanks, exteriors, pipes especially for bridges, general use in factories, metal railing and gate

****Available in 5 Litre**

HEAVY DUTY COATINGS

TOA Epoxy Coatings - Finishes

Epoxy coating can be applied on steel or concrete surface. It is suitable for interior industrial flooring where the desired surface needs to be smooth, hard, durable and resistant to chemical. It is also suitable for marking of working zone and hazardous area. These kind of paints are widely used as protective and finishing coat for steel structure.

CONVENTIONAL PROTECTIVE COATINGS

TOA Roadline Paint

High performance alkyd modified roadline paint designed for road marking on tar surface like centerlines, edge lines, crossway and etc. It is fast dry and has excellent resistance to bleed through of bitumen with good abrasion resistance. Also available in reflective type. The reflection type contains selected tiny glass spheres which reflect light back to the source and thus ensure the markings more visible to the driver at night.

TOA Zinc Chromate Primer

An alkyd based rust inhibitive primer pigmented with zinc chromate.

Captain Metal Primer

An air dry alkyd based product for protection on metal against corrosion under non-immersed condition. Can be applied for both indoor and outdoor condition. Only require minimum surface preparation such as hand scrubbing with wire brush. Ensure the surface to be painted is free from rust, loose scales and old paint film. Suitable for all common interior and exterior ferrous metal in the decorative and light performance market.

TOA Micaceous Iron Oxide

An Alkyd paint pigmented with micaceous iron oxide to enhance corrosion protection in comparison to color pigmented gloss finish. Being resistant to atmospheric pollution, high humidity and mild chemical fume attack, it gives protection to the interior and exterior of steelwork, typically in the mild marine and industrial environment.
